Spokane Falls Trout Unlimited and the Spokane Riverkeeper River Sediment Study 2018/2019

Help to monitor the effects of Hangman Creek's sediment plume on the Spokane River. Training at:

- 12/19/18 at 5:30 at the Community Building (35 W. Main)
AND/OR
- 12/29/18 at 11 St. Bridge over Hangman Creek in High Bridge Park at 11 AM
- Please RSVP or for more information write to:
jschultz@cforjustice.org
- For more information on the project:
<https://spokanefallstu.org/spokane-river-sediment-study/>

Sample runs generally take 1.5 hours. Sample as often as you wish, but first sign up at spokanefallstu.org. Please try to attend one of the above trainings, but if you can't make it, I can do a quick training around your schedule. Volunteers must have their own transportation.

Confluence of Hangman Creek and the Spokane River on March 13th, 2018

Sampling is fun and easy!
